

DMTech Ltd. Quality Policy Statement

“The management policy of DMTech Ltd. is aimed at the development and production of electronic equipment in the field of fire alarm, fire extinguishing and accompanying automation for fire protection, with guaranteed quality, meeting the requirements of customers with a controlled environmental impact that brings maximum benefit to the organization and stakeholders.”

For the implementation of this policy, DMTech is committed to:

- ❖ Establishing the organization as a competitive supplier of quality-assured products in accordance with the requirements of EN 54 standards.
- ❖ Expanding market share by maintaining an optimal quality/price ratio.
- ❖ Annually reviews and validates environmental management goals for continuous improvement of the system.
- ❖ Translating our customers' needs and expectations into requirements for our products.
- ❖ Efficient use of available material, human and financial resources in order to meet the requirements of customers, staff and stakeholders.
- ❖ Creating and maintaining conditions for compliance with the regulatory requirements for the activities performed.
- ❖ Conducting systematic training of the staff to improve their qualification and motivation for dedication to the work performed in order to achieve good results.
- ❖ Optimization of production processes according to the requirements of stakeholders and environmental protection.
- ❖ Control of efficiency in the use of equipment, materials and energy.
- ❖ Reinvestment in new production facilities and technologies to limit the negative impacts on the environment and maintain high and stable quality of the services and products offered.
